

# Spin Mini

## Give shape to your dreams and delight your customers

The Mini Spin was co-created with the Hans Brunner team, a German company that is a global leader in the production of high-quality chocolate molds, with over 80 years of experience in the market.

The result of this partnership is the creation of the smallest and most affordable chocolate shell production system in the world, designed to meet a product that still has significant growth potential to every chocolate business: chocolate figures and shells.

## Ready to do it all.

The Mini Spin is portable and easy to carry, and with Brunner's exclusive catalog of individual molds, you can produce a variety of fantastic figures and shells in shops or small spaces.

## Do your best work with perfection and simplicity.

Since the Mini Spin operates with individual molds, you can work with a manual dosing process using just a scale, allowing you to weigh each mold separately to ensure consistent results.

For larger centrifuges, a dedicated dosing machine is required.

## The best cost-benefit solution in the market

Our vision was to lower the entry barrier for a chocolate shell production system at every level.

To optimize your chocolate shell production with the machines available on the market today, you need to invest in a medium-sized centrifuge, larger molds, tempering machines, dosing machines, cooling tunnels, and other equipment.

Now, with just one kit consisting of the Mini Spin + 20 individual molds, you can already make up to 36 shells per hour, with various shapes, providing you with more flexibility to diversify production with minimal manual labor.

## Explore New Uncharted Paths

In addition to shells and figures, with the Mini Spin, you'll also have access to an exclusive mold for producing spheres.

It's your chance to gain the autonomy to create your own filled spheres, even with your own chocolate and unique cocoa butter designs.

In other words, it's time to have the freedom to innovate and create your best products. **Finally.**

# Precision in every detail.

With the variety of figure and egg models available in Brunner's catalog, you won't run out of options to choose from and create **unique and memorable chocolate products.**

The exclusive manufacturing technology, combined with Brunner's decades of 3D modeling know-how, makes the Mini Spin's exclusive mold selection a treasure trove of incredible figure models to choose from. Just take a look at the mold, and you'll see the difference. It's truly something else.

## Data Sheet

Production per Hour	<b>Up to 36 molds</b>
Magnets	<b>High-Performance Neodymium</b>
Maximum Weight per Arm	<b>2kg</b>
Shell formation time	<b>8-16 Minutes</b>
Mold switch time	<b>2 Minutes</b>
Structure, parts and accessories	Stainless Steel
Motor	BOSCH
Voltage	<b>220V Single-Phase</b>
Consumption	<b>0,33kW/h</b>
Net Weight (without Molds)	<b>11kg</b>
Buttons and actuators
